

Science Teacher, Grades 7-9

Indian Mountain School (IMS) is seeking a dynamic, student-centered educator to serve as its Grades 7–9 Science Teacher. This position calls for a collaborative teacher who understands the developmental needs of early adolescents and is committed to inspiring curiosity, critical thinking, and a lifelong love of scientific inquiry.

The successful candidate will design and deliver engaging, hands-on science instruction that challenges students to think deeply, ask meaningful questions, and connect scientific concepts to the world around them. At IMS, science is not simply a body of content to be covered; it is an active process of discovery. Students learn to design investigations, analyze data, collaborate effectively, and communicate their findings with clarity and confidence.

The position offers the opportunity to innovate within the curriculum, integrate technology and real-world applications, and foster a classroom culture rooted in curiosity, responsibility, and joy in learning. Key teaching and community responsibilities include:

- **Seventh Grade Science:** Teaching a Sustainability Science curriculum grounded in earth science concepts.
- **Eighth Grade Science:** Leading a laboratory-focused course emphasizing physical science and introductory chemistry principles.
- **Ninth Grade Science:** Teaching a high school–level biology course.
 - (Note: teaching assignments based on candidate experience and needs of the department)
- **Curriculum Development:** Collaborating with colleagues to refine and strengthen the science program and incorporate inquiry-based learning and real-world applications.
- **Student Advising:** Serving as a trusted advisor who supports students' academic progress and personal growth.
- **Residential Life Participation:** Contributing to the life of the boarding community through dorm responsibilities or related programming.
- **Athletics or Co-Curricular Involvement:** Coaching or supporting the school's athletic or extracurricular programs based on interest and experience.

This is a faculty role with significant impact: shaping curriculum, mentoring students through a critical developmental stage, and helping ensure that science education meaningfully advances the school's mission and strategic priorities.

The Grades 7–9 Science Teacher will contribute to a cohesive Middle School experience by working closely with colleagues across disciplines, advising students, and supporting the broader life of the school.

Please send resume and application materials to employment@indianmountain.org. Candidates whose qualifications and experience align with the school's needs will be contacted.

Indian Mountain School seeks faculty and staff members who are eager to participate in an inclusive, respectful, and diverse school community. Candidates from diverse backgrounds are encouraged to apply.

Indian Mountain School is an equal opportunity employer and does not discriminate on the basis of race, color, creed, religion, sexual orientation, national or ethnic origin in the administration of its employment policies, educational policies, admissions policies, financial aid and loan programs, and other school-administered programs.
